

Huawei eKitEngine S220 Series Switches

Easy to use & maintain

eKit app-based
deployment and O&M

All-new appearance

German Red
Dot Design
Award 2022

High quality

Strictly tested with 8 major items
& 66 sub-items: 1/3 failure rate
of the industry average

Based on the next-generation high-performance hardware and software platform, Huawei eKitEngine S220 series switches stand out with features such as flexible Ethernet networking, and diversified security control. In addition, eKitEngine S220 series switches support delivering higher performance and more powerful service processing capabilities. These make them ideal for various application scenarios, such as enterprise campus access and gigabit to the desktop.

Product Features and Highlights

Flexible Ethernet Networking

- In addition to traditional Spanning Tree Protocol (STP), Rapid Spanning Tree Protocol (RSTP), and Multiple Spanning Tree Protocol (MSTP), eKitEngine S220 series switches support the latest Ethernet Ring Protection Switching (ERPS) standard in the industry. ERPS is defined in ITU-T G.8032. It provides millisecond-level protection switching based on traditional Ethernet MAC and bridging functions.

Diversified Security Control

- eKitEngine S220 series switches support multiple security authentication modes including MAC address authentication and 802.1X authentication, and dynamically deliver user policies (VLAN, QoS, and ACL). eKitEngine S220 series switches support port-based 802.1X authentication, MAC address authentication, and multi-mode authentication.
- eKitEngine S220 series switches provide a series of mechanisms to defend against DoS attacks and user-targeted attacks. DoS attacks are targeted at switches and include SYN flood, Land, Smurf, and ICMP flood attacks. User-targeted attacks include bogus DHCP server attacks, IP/MAC spoofing attacks, DHCP request flood attacks, and attacks with variable DHCP CHADDR values in packets.
- eKitEngine S220 series switches can generate and maintain DHCP snooping binding entries and discard invalid packets that do not match the binding entries. DHCP snooping trusted and untrusted ports can be specified to ensure that users connect only to the authorized DHCP server.

Easy Operations and Maintenance

- eKitEngine S220 series switches can be managed and maintained using SNMPv1, SNMPv2c, SNMPv3, CLI, web system, or SSHv2.0.

PoE Power Supply

PoE models of eKitEngine S220 series switches provide the following capabilities:

- Fast PoE: PoE switches can supply power to PDs within seconds upon power-on, which is different from common switches that supply power to PDs in 1 to 3 minutes after power modules are installed. When a PoE switch restarts due to a power failure, it continues to supply power to PDs immediately after being powered on without waiting until it completes the restart. This greatly shortens the power-off time of PDs.
- Perpetual PoE: When a PoE switch restarts (for example, during software upgrade), it continues to supply power to downstream PDs, ensuring uninterrupted PoE power supply.

Smart Upgrade

- Based on Huawei Online Upgrade Platform (HOUP), eKitEngine S220 series switches support smart upgrade. They obtain the version upgrade path from the HOUP and download the new system software. The upgrade process is highly automated as it supports one-click upgrade. In addition, this feature supports system software pre-loading, which greatly shortens the upgrade time and reduces the service interruption time.
- Smart upgrade greatly simplifies device upgrade operations, making it possible for customers to upgrade versions by themselves. This feature helps customers reduce considerable maintenance costs. In addition, the upgrade policy of the HOUP is used to standardize the upgrade path, which greatly reduces the risk of upgrade failure.

Cloud Management

- Huawei eKit app allows users to configure, monitor, and inspect switches on the cloud, reducing onsite deployment and O&M manpower costs and decreasing network OPEX.
- eKitEngine S220 series switches support both cloud management and on-premise management modes. These two management modes can be flexibly switched as required to achieve smooth evolution while maximizing return on investment (ROI).

Product Specifications

Item	ekitEngine S220-24T4X	ekitEngine S220-24P4X	ekitEngine S220-48T4X
Switching Capacity	128 Gbps	128 Gbps	176 Gbps
Packet forwarding	95 Mpps	95 Mpps	131 Mpps
Fixed port	24 x 10/100/1000BASE-T ports, 4 x10GE SFP+ ports	24 x 10/100/1000BASE-T PoE+ ports, 4 x GE SFP+ ports	48 x 10/100/1000BASE-T ports, 4 x GE SFP+ ports
Chassis dimensions (H x W x D)	43.6 mm x 442 mm x 220 mm	43.6 mm x 442 mm x 220 mm	43.6 mm x 442 mm x 220 mm
Chassis height	1 U	1 U	1 U
Weight in full configuration (including packaging materials)	3.44 kg	3.79 kg	3.59 kg
Power module type	Built-in AC power module	Built-in AC power module	Built-in AC power module
Rated voltage	100 V AC to 240 V AC, 50/60 Hz	100 V AC to 240 V AC, 50/60 Hz	100 V AC to 240 V AC, 50/60 Hz
Maximum voltage	<ul style="list-style-type: none"> AC input: 90 V AC to 290 V AC, 45 Hz to 65 Hz 	<ul style="list-style-type: none"> AC input: 90 V AC to 290 V AC, 45 Hz to 65 Hz 	<ul style="list-style-type: none"> AC input: 90 V AC to 290 V AC, 45 Hz to 65 Hz
Maximum power consumption	35.04 W	<ul style="list-style-type: none"> Without PoE: 44.35 W With PoE: 485.91 W (PoE: 400 W) 	44.3 W
Noise	<ul style="list-style-type: none"> Sound power at normal temperature: 47 dB (A) Sound power at high temperature: 51 dB (A) Sound pressure at normal temperature: 35 dB (A) 	<ul style="list-style-type: none"> Sound power at normal temperature: 49.3 dB (A) Sound power at high temperature: 63 dB (A) Sound pressure at normal temperature: 37.3 dB (A) 	<ul style="list-style-type: none"> Sound power at normal temperature: 46.6 dB (A) Sound power at high temperature: 54.3 dB (A) Sound pressure at normal temperature: 34.6 dB (A)

Service features

Feature	Description
MAC address table	Automatic MAC address learning and aging
	16K MAC address entries at maximum
	Static, dynamic, and blackhole MAC address entries
	Source MAC address filtering
	Limitation on the number of MAC addresses learned by an interface
VLAN features	4094 VLANs
	Voice VLAN
	VLAN assignment based on MAC addresses, protocols, IP subnets, policies, and ports
	VLAN stacking
Ethernet switching	G.8032 Ethernet Ring Protection Switching (ERPS)
	STP (IEEE 802.1d), RSTP (IEEE 802.1w), and MSTP (IEEE 802.1s)
	BPDU protection, root protection, and loop protection
	BPDU tunnel
Multicast	IGMPv1/v2/v3 and IGMPv1/v2/v3 snooping
Reliability	Link Aggregation Control Protocol (LACP)
	Link Layer Discovery Protocol (LLDP)
QoS/ACL	Traffic rate limiting in the inbound and outbound directions of a port
	Packet redirection
	Port-based traffic policing and two-rate three-color CAR
	Eight queues on each port
	DRR, SP, and DRR+SP queue scheduling algorithms
	Re-marking of 802.1p and DSCP priorities for packets
	Packet filtering on Layer 2 to Layer 4, filtering out invalid frames based on the source MAC address, destination MAC address, source IP address, destination IP address, TCP/UDP source/destination port number, protocol, or VLAN
	Queue-based rate limiting and traffic shaping on ports
Security features	Hierarchical user management and password protection
	Defense against DoS, ARP, and ICMP attacks
	Binding of the IP address, MAC address, port ID, and VLAN ID
	Port isolation, port security, and sticky MAC
	Blackhole MAC address entries
	Limitation on the number of learned MAC addresses
	IEEE 802.1X authentication and limit on the number of users on an interface

Feature	Description
	Multiple authentication modes including AAA, RADIUS, HWTACACS and NAC authentication
	SSH v2.0
	HTTPS
	CPU protection
	Blacklist and whitelist
	DHCP client and DHCP snooping
Management and maintenance	Cloud management based on NETCONF/YANG
	Virtual cable test (VCT)
	Remote configuration and maintenance by using Telnet
	SNMPv1/v2/v3
	Web system-based management
	HTTPS
	LLDP/LLDP-MED
	System logs and alarms based on severities
	IEEE 802.3az: Energy Efficient Ethernet (EEE)
	Port mirroring
	Deployment through the registration query center
